CERCLIS ID No. ILD 048300412

Dear Mr. Sharkey:

Please find enclosed, as requested, one copy of the 12 photographs taken during the site reconnaissance of Alco Springs Industries on Tuesday, February 7, 1995.

Pending evaluation of data collected during the site reconnaissance, BVWS has tentatively scheduled a second site visit to begin on Monday, March 27, 1995, at 8 a.m. to conduct sampling and gather additional information about environmental conditions on and around the site. The sampling effort will include two or three BVWS personnel and last approximately 2 days.

FSIP evaluations typically involve collecting and analyzing six to ten groundwater, sediment, surface water, or soil samples. You have the option to receive split environmental samples for analyses by your own laboratory if you provide sample containers to the BVWS team during the sampling visit. Laboratory analysis and sample shipment will be your responsibility.
